## Plenarium: A Business Plan

Another individual participation event, where you can present the entrepreneur side of yours before the jury. This event will judge your mettle on modern business skills. You have to come up with master business plan which possesses the potential of succeeding in pharma sector.

The Industrial revolution brought in a new era of large scale businesses. As time passed, people realized that new areas of business were needed to help the existing ones, so finance and management came up. Slowly people became buyers from mere consumers and that gave rise to advertising and marketing, so one chain of events lead to another, and another and so on.

Today we see a completely different world from what it was a few decades ago and it's all because of the rapid growth in the business sector.

Now deep down we all want to have our own firm, a business empire that we rule, but everything starts with a small idea or what some people call a simple Business Plan. Don't just sit there and keep dreaming! Instead live that dream and make the B-Plan that might just make you realize it.

If your idea seems good enough who knows you might be the next Steve Jobs!
